

BUDDING BOTANISTS PROGRAM

Northern California Botanists (NCB) is starting a Budding Botanists program to engage early career botanists in the professional community. Members of the Northern California Budding Botanists will be added to our NCB listserv and receive notifications about classes and workshops, invited to career sessions during the Northern California Botanists Symposia, and provided the opportunity to interact with a professional botanist for any career questions

that they may have. To join, ask career questions, or volunteer to answer career questions as an Experienced Botanist/Mentor, please contact the Budding Botanists Program Chair.
